Brand Awareness Video	\$2600	\$1000	0.73	\$1.18	\$104.0	1.14	0.38

Charts

AI-Generated Insights & Recommendations

Recommendations to Improve Overall Campaign Performance

1. **Optimize Underperforming Channels:**

- Analyze the targeting and creative strategies for campaigns like YouTube PreRoll and Snapchat Story Ads, which have low ROAS (0.8 and 0.82, respectively). Consider A/B testing different ad formats, messages, or audiences to improve engagement and conversion rates.

2. **Leverage High-Performing Campaigns:**

- Increase the budget for Email Newsletter Ads and Retargeting Display campaigns, as they have the highest ROAS (9.0 and 7.5, respectively). Allocate additional funds to these campaigns to capture more conversions from engaged audiences.

3. **Enhance Conversion Rates:**

- Focus on improving the conversion rates of campaigns with lower performance, such as Instagram Reels Promo (1.9% conversion rate) and TikTok Awareness (1.15% conversion rate). Implement strategies like better landing page optimization, clearer calls-to-action, or tailored messaging to boost conversions.

Campaigns for Increased Budget

- **Email Newsletter Ads:**

- **Justification:** Highest ROAS (9.0) and a solid conversion rate (6.43%). Increasing the budget could yield significant returns.

- **Retargeting Display:**

- **Justification:** Strong ROAS (7.5) and a good conversion rate (6.0%). This campaign effectively converts previous visitors, indicating a high potential for revenue growth with additional investment.

Campaigns to Pause or Reduce Budget

- **Brand Awareness Video:**

- **Justification:** Extremely high CPA (\$104.0) and low ROAS (0.38). The campaign is not generating sufficient returns and should be paused or significantly reduced.

- **YouTube PreRoll:**

- **Justification:** Low ROAS (0.8) and high CPA (\$50.0). This campaign is not performing well and should either be paused or re-evaluated for optimization.

- **Snapchat Story Ads:**

- **Justification:** Low ROAS (0.82) and high CPA (\$36.67). Consider reducing the budget or pausing until a more effective strategy is developed.

By focusing on high-performing campaigns and addressing the underperformers, overall campaign performance can be significantly improved.
